## **DETAILED ACTION**

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 5-11, 13-14, and 19-20 are rejected under 35 U.S.C. 102(b) as being anticipated Lodge et al by (US5188859).

Lodge et al discloses a method for producing foods which may cooked in the presence of microwave energy comprising the steps of selecting a friable food, compressing the food into a pellet, coating the surface with a microwavable heatable substance (abstract; column 6, lines 17-20), the food product is flour and starch (column 3, line 40-41) with water (column 4, line 8), flour is from the group consisting of potato, wheat, corn, bran, rice or combinations thereof (column 3, lines 48-60), flavoring combined with pellet (column 4, lines 40-44), grinding food product into a paste and mixing with water (column 4, lines 60-62; column 5, lines 6-14), coating pellet with oil (column 5, lines 25-38), separating and microwaving the pellets (column 5, lines 49-58; column 6, lines 17-20), container allows the passage of air but provides a moisture and heat barrier (column 5, line 49-58), and container separates pellets (column 5, lines 49-58).

### ***Claim Rejections - 35 USC § 103***

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

Art Unit: 3742

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2-4, and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lodge et al in view of Brastad (US4267420).

Lodge et al discloses all of the recited subject matter except a breathable, polyester, heat resistant cover having a top and bottom layer with a thickness between 70-100 gauge. Brastad discloses a breathable, polyester, heat resistant cover having a top and bottom layer with a thickness between 70-100 gauge (column 3, lines 42-51; column 4, lines 6-24). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included the cover of Brastad in the method of Lodge et al because, a breathable, polyester, heat resistant plastic cover allows the food item to attain the desired browning and crispening.

#### ***Allowable Subject Matter***

5. Claims 15-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

#### ***Conclusion***
